Mir Md Habibullah (Meer Habib)

Senior Mobile Engineer · React Native, Expo & native iOS · voice and vision AI

Chittagong, Bangladesh · Remote, UTC+6 (full EU day, US ET mornings) · meerhabib200@gmail.com · +880 1859 703962
mbuilds.studio · linkedin.com/in/meer-habib-dev · github.com/meer-habib-dev · upwork.com/freelancers/meerhabib

Mobile engineer with 5 years of shipping React Native and Expo apps: **27 apps live**, including **ChartDetector AI (150K+ traders)** and **Ringo**, an AI business phone with native VoIP. I own products from architecture to App Store across native iOS, Supabase and Convex backends, and LLM, vision and voice-AI features. Upwork Top Rated, 100% Job Success.

EXPERIENCE

KI Koehler International · Lead Mobile Engineer, ChartDetector AI — 2025 – Present

AI chart analysis for stocks, crypto and forex · 150K+ traders · 4.4★ App Store · iOS and Android · 7 languages

- Lead the iOS and Android app end to end on Expo and TypeScript: architecture, design, AI and every store release.
- Built the core flow: a trader photographs a chart and gets trend, patterns, key levels and a trade plan from OpenAI Vision, called through Supabase Edge Functions so model keys never ship in the app.
- Shipped a daily AI news briefing scored by likely price impact, a trading academy, and RevenueCat subscriptions.

Navis One Lab LLC · Lead Full-Stack Mobile Engineer, Ringo — Jun 2025 – Jun 2026

Ringo: AI business phone for small teams · 4.7★ App Store

- Built VoIP calling on Twilio Voice, CallKit and PushKit, so calls ring like native phone calls even when the app is closed, and one team inbox for calls, SMS and WhatsApp.
- Shipped an AI voice agent (ElevenLabs + LiveKit) that answers and routes calls when the team is busy, with recordings, transcripts, AI summaries and drafted replies.
- Designed the Supabase backend (PostgreSQL, Row Level Security per team, Realtime, Edge Functions) and ran every App Store release through EAS Build and OTA updates.

Independent · Own iOS apps and Upwork contracts (Top Rated) — 2021 – Present · Part-time

- Launched 8 iOS apps of my own in 2025–26, from idea to App Store, and delivered client apps for teams in 10+ countries.
- Dev Partner: Swift Live Activity while recording, WidgetKit widgets, App Intents, AI chat over notes.
- Lock Card renders with Skia at the device's exact pixel size, so the preview is the saved wallpaper. Mend puts a consent gate before any text leaves the phone.
- Work AI-native in Claude Code and Cursor, with custom skills for my design system and MCP tools that let agents generate App Store screenshots.

Netmark · Mobile App Developer · React Native and Ionic apps for service businesses · Jun 2024 – May 2025

Softech · Mobile App Developer · B2B and B2C React Native apps, customized per client · 2023 – Mar 2024

AlgoSolver LLC · Web & Mobile Developer · Next.js web and React Native app features · Sep 2021 – Jan 2023

SHIPPED WORK & WRITING

27 apps with store links at mbuilds.studio/work · **17 essays** on AI agents, MCP and system design at mbuilds.studio/writing

SKILLS

Mobile: React Native (New Arch), Expo (Router, EAS, Modules), TypeScript, Swift, SwiftUI, Reanimated, Skia, Zustand

Native: CallKit, PushKit, WidgetKit, Live Activities, App Intents, HealthKit, Health Connect, Core ML, Vision

AI: OpenAI, Claude, Gemini (AI SDK), vision, voice agents (ElevenLabs, LiveKit), Whisper, MCP, Claude Code
